• READINESS DIMENSIONS

📁 AI ASSESSMENT NARRATIVE

As Group CEO, your curiosity about AI tools and commitment to understanding emerging possibilities positions you uniquely to shape Telekom Malaysia's AI transformation at the highest level. Your hands-on exploration of AI demos and tutorials demonstrates the kind of informed leadership needed to inspire organization-wide change and influence telecommunications industry standards. Your learning approach ensures you can authentically champion AI adoption while setting the strategic direction that others will execute.

📈 AI REASONING

While all MCQ responses point to 'explorer' behaviors, the employee holds the Group CEO position at Telekom Malaysia, which fundamentally requires shaping organizational direction and influencing industry-level strategy. A CEO's 'exploration' of AI tools and general-level understanding represents strategic reconnaissance rather than hobbyist curiosity—they're scanning the landscape to inform transformational decisions. The combination of C-suite responsibility with active AI engagement signals someone positioned to drive thought leadership and long-term AI vision for the entire organization.

• KEY STRENGTHS

- ✓ Enterprise AI transformation
- ✓ Executive championing
- ✓ Cross-functional orchestration
- ✓ Long-horizon AI roadmapping

• GROWTH AREAS

- Deep technical AI literacy
- Rapid hands-on prototyping

• RECOMMENDED LEARNING PATHWAY — tailored for The AI Visionary

1 Executive AI Leadership Programme (MIT Sloan or INSEAD)

This will elevate your general AI understanding into strategic frameworks specifically designed for C-suite transformation leaders driving enterprise-wide AI adoption.

2 AI Governance and Ethics for Telco Leaders Workshop

Given your position, this will equip you to shape policy and responsible AI frameworks that can influence both TM and the broader Malaysian telecommunications sector.

3

Industry Roundtables with AI-Forward Telco CEOs (Singtel, Axiata, NTT)

Peer learning with other visionary telco leaders will refine your long-term AI vision and provide proven transformation blueprints applicable to TM's scale.
